

SL20-22B Side Venetian 2.0

ScreenLine® SL20-22B Side Venetian 2.0 is a **manually-operated magnetic** system with **tilting function** for venetian blinds encapsulated within 20-mm or 22-mm cavity double glazing units.

SL20-22B Side Venetian 2.0 is operated by a magnetic knob, placed on the right or left-hand edge of the glass. The blind is tilted by gently rotating the knob.

SL20-22B Side Venetian 2.0 is suited to all types of window frames.

It ensures with time the insulating properties of the double-glazing unit, notably protection from dirt or weather conditions. The integrated unit can be fitted into the window frame like standard IGUs.

The system is supplied with warm edge spacer bar as standard.

The external knob is treated with a Sanitized®* patented finish, which provides a long-lasting antimicrobial protection function.

COLOUR RANGE

* Active biocidal substance: silver borophosphate glass

FEASIBILITY CHARTS

Possible dimensions:

Tilt-only blind

W min = 250 mm

W max = 1500 mm

H min = 300 mm

H max = 2200 mm

Maximum height possible according to width

with W from 260 to 400 mm H max = 1800 mm

with W from 401 to 1500 mm H max = 2200* mm

* The 2.5 m² maximum area cannot be exceeded. Blind supplied completely raised.
